VAMP-TECH spa, located in Busnago (Milan – Italy) has signed an agreement with the Chinese producer KINGFA for the distribution of the biodegradable thermoplastic compounds ECOPOND on the Italian and Spanish market.

ECOPOND line includes biodegradable compounds with high mechanical properties as well as a very high degree of fluids impermeability , even at extremely low thickness.  
ECOPOND can be employed in applications such as:

- Shopping bags
- Waste bags (waterproof)
- Catering items
- Blow building
- Stationary items

ECOPOND is completely biodegradable and compostable in accordance with the norm EN13432  
ASTM D6400 Japanese GreenPla.  
ECOPOND is certified by AIB-Vinçotte International with the marking OK compost.
