Halogen Free Extrusion from Vamp Tech

In front of increasing market demand for Polypropylene based halogen free compounds for building applications, Vamp-tech developed a PP UL94-V0 till 0,8 mm and totally halogen free compound suitable for extrusion.

This new material, marketed as VAMPLEN 0024 V0 EC, can be used for the production of corrugated and smooth pipes, profiles, tubes and sheets. Production of thermoformed plates and blow molded parts can be performed.

The overall performance of VAMPLEN 0024 V0 EC is absolutely innovative. Indeed it results to be UL94-V0 at 0,8-3,2 mm, an extremely high Limiting Oxygen Index values (LOI = 42%), a low density and a low smoke toxicity during the combustion and also excellent mechanical performance that makes it appropriate for the realization of thin and flexible particulars like corrugated pipes.

Vamp-Tech, leader in the flame retardant compounds with 25 years of experience in this field, has up today 85 products which are certified UL-94 V0 by the Underwriters Laboratories and it is certified by VDE for the products compliance to the EN-60335 4^a ed. standard

Furthermore Vamp-Tech has got a wide range of products certified according to the European standards for the building and transport applications including, 12 Italian 1st Class Certifications, 25 French Standard NF-16-101 Certifications and some other homologations as per the German DIN 4102 and DIN 5510 standards and as per the Canadian Bombardier.
